

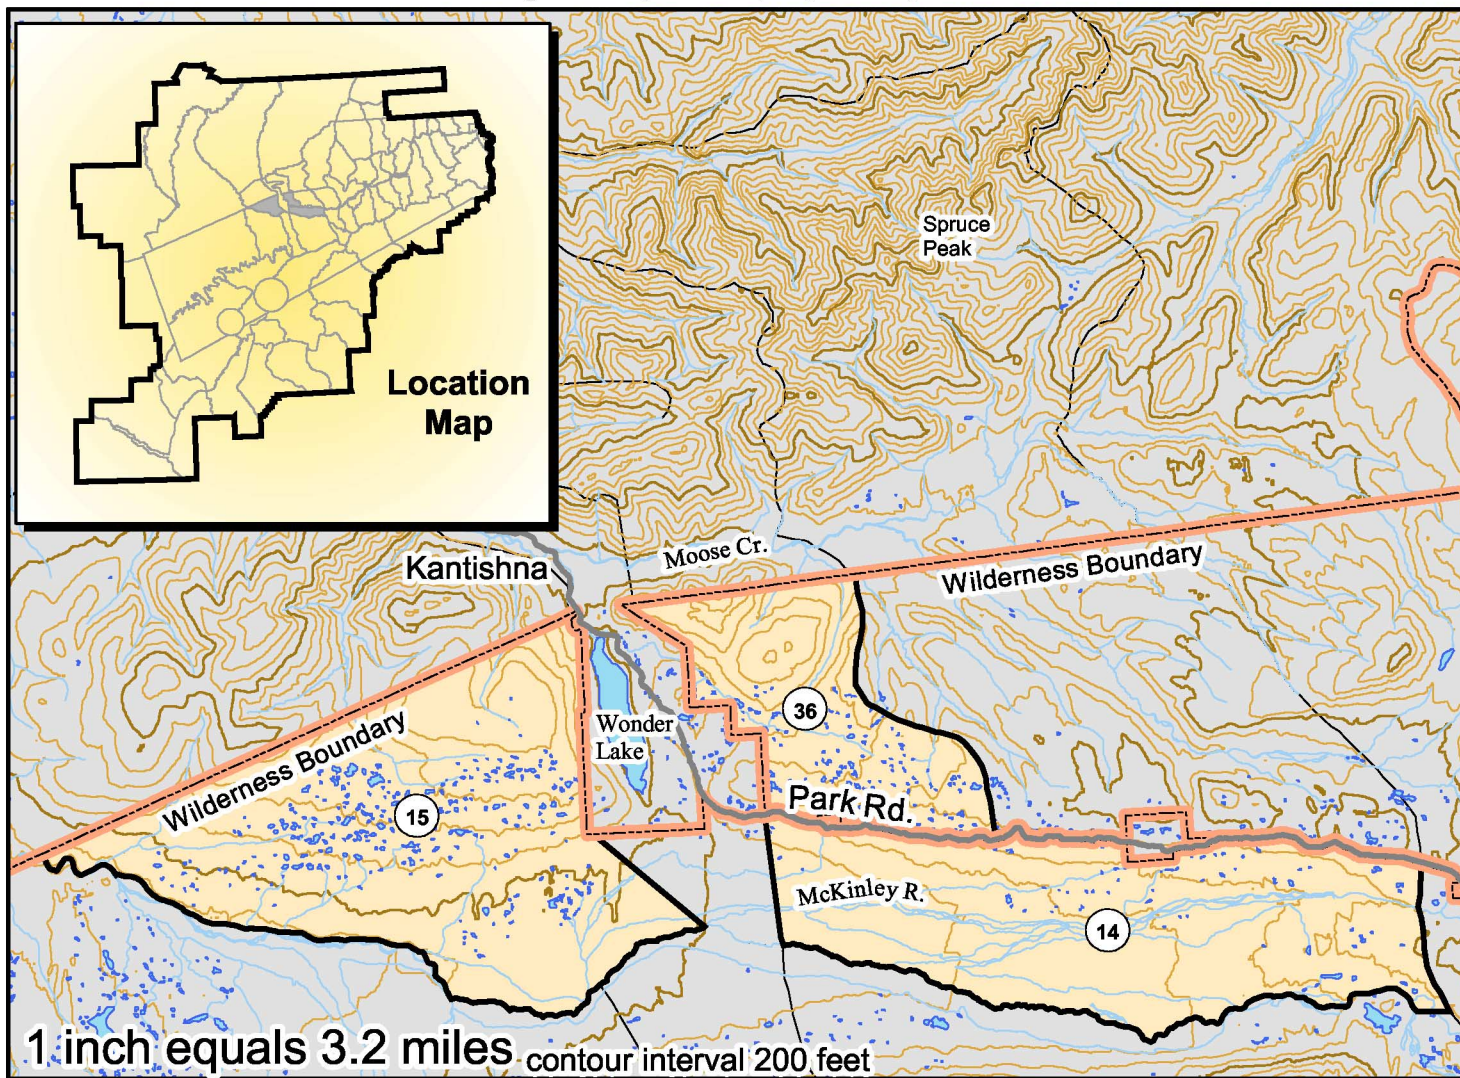

Map 2-23 - (Units 14, 15, and 36)

McKinley Bar East, McKinley Bar West, Jumbo Creek (Unit 14,15,36)

West of Wonder Lake, a series of low tundra hills are interspersed with small and medium-sized tundra ponds and birch and willow communities. Moose Creek runs east of Wonder Lake and the low hills are covered in various tundra types. Many archeological sites and mining-related features and equipment around Wonder Lake.

This area is used heavily by visitors from Kantishna-based lodges and from visitors staying at the Wonder Lake campground. In summer, frequent noise from air traffic and frequent day use from Kantishna-based lodges degrades wilderness character.
